

# Elegant Intercom Upgrades

## INTIP-2W Series: Residential 2-Wire IP Intercom System

The VIP Vision 2-wire Residential IP Video Intercom is the perfect upgrade solution to your old intercom or door bell system. Upgrade and experience a multitude of modern intercom features, all using your existing two-wire infrastructure.

Enjoy two-way video/audio talk, visitor video messaging, record door station camera snapshots/footage and more. You can even connect your 2-wire system to the Internet via the 2-wire Network Controller to control your intercom from your phone or tablet. Ideal for homes, apartments, duplexes and business, the VIP Vision 2-wire Intercom series also integrates with most door strikes and sensors.

**1**  
Upgrade your intercom system to IP using the existing two-wire infrastructure

**2**  
Expand your system by connecting your IP intercom to your network and the Internet

**3**  
Live view, snap images, answer visitors and even unlock doors from anywhere

- Includes surface mount and DIN-rail mounting options

## System Map

Easily upgrade your intercom or door bell to a VIP Vision IP Intercom System using the existing 2-wire infrastructure.

The system supports network and power over 2-wire bus and can integrate multiple indoor intercom monitors.

Door strikes and sensors will require their own power wired at the door.
